

As a Board Member, I plan to

- Ensure the safeguarding of all members and their students is a priority
- Listen to all members' needs and opinions and act upon this, where appropriate
- Liaise with a wide range of organisations to extend the reach of TTA and share this with membership
- Help raise the profile of both national and international tuition as a mainstream form of education and position it as such
- Observe the use of regulation in this industry and consider how this can be managed effectively
- Observe the use of a range of technology and consider how this can be managed effectively and with proper safeguarding measures
- Value research and keep members informed of relevant research
- Increase the international market for members and encourage internationalisation
- Share my 29 years' experience with the membership and value the experience and expertise of others
- Help to grow the face-to-face events
- Help to grow the CPD element
- Consider the impact of change (eg. increasing debt in schools, VAT in independent schools) and how we can mitigate this
- Consider the changing landscape of clientele (eg. Increasing numbers of children unable to cope with the school environment, increased ADHD and ASD diagnosis)
